

NOKIA

Comes With Music

Get Started

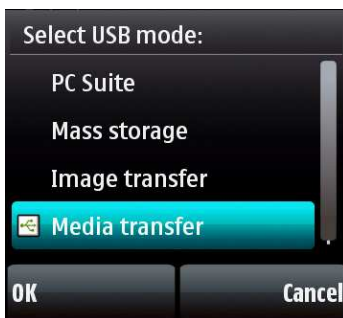

1

Install Nokia Music to your PC from the CD supplied in the sales package or from music.nokia.com/download.

Nokia Music lets you transfer music to and from your PC and your Comes With Music device, build playlists, rip CDs and manage your music library

2

Connect your Comes With Music device to your PC using the USB cable (you'll find it in the box) and select Media transfer, Media player, or Printing and Media (depending on your device)

3

Launch Nokia Music for PC and open the Nokia Music Store tab

4

Click the 'Comes with Music Enter PIN' link on the homepage, or if you have a touch device, first click 'Join or Sign in'

5

Create a new or existing username and password and enter the exclusive PIN number that came with your device

Start Downloading

6

Open Nokia Music and click the STORE tab on your PC or click the MUSIC STORE icon on your Comes With Music device.

Sign-in and explore millions of tracks to download whatever and whenever you like to your PC and mobile device

7

Explore music via the 'Genre' pages featuring hand-selected editor recommendations, showcasing the best of today's and yesterday's music.

Click Charts for the latest hits or Playlist Hub for Celebrity Recommendations and themed playlists suggestions.

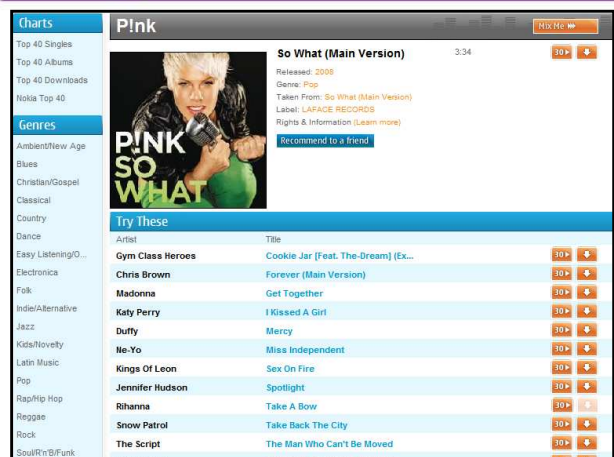

9

Click the 30 SEC CLIP icon to preview music.

Click the DOWNLOAD icon to download songs directly to your device or your PC.

8

Discover music from other listeners with similar tastes with the 'Try These' tab on the artist's page or under the album or single you are currently viewing.

These recommendations are based on similar listening and buying habits of other music fans in your country

10

Store all the music you want and enjoy!
